Additional Information:

It is important that the footwear selected is suitable for the protection required and the wear environment. To ensure the best service from footwear it is important that the footwear is regularly cleaned and treated with a suitable cleaning product (do not use caustic cleaning agents).

Wet footwear should be allowed to dry naturally under cool dry conditions and not force dried.

Service Life: The actual wear life is dependant upon the type of footwear and the environmental conditions which can effect the wear, contamination and degradation of the product'
