OEKO-TEX®

The **OEKO-TEX®** Standard 100 is an independent testing and certification system for textile raw materials, intermediate and end products at all stages of production. **OEKO-TEX®** testing for harmful substances always focuses on the actual use of the textile. The more intensive the skin contact of a product, the stricter the human ecological requirements to be met. The requirement for certification of textile products according to **OEKO-TEX®** Standard 100 is that **all components** of an item have to comply with the required criteria without exception – that means in addition to the outer material any sewing threads, linings, prints etc. as well as non-textile accessories, such as buttons, zip fasteners, rivets etc, must also comply.
